

Create Binance API Key

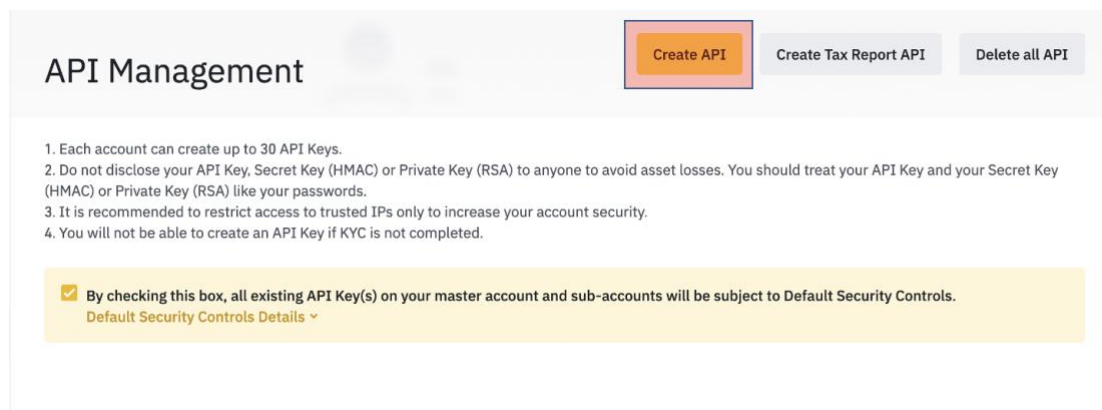

Step1.

Entry API Management, follow below step

Step2.

Click create API bottom

Step3.

1. Click Restrict access to trusted IPs only (Recommended)
2. Add your IP address (* Make sure to do it correctly, otherwise there may be issues. When the program is executed, it requires authorized IP addresses to run smoothly.)
3. Open permission "Enable Spot & Margin Trading"
4. Open permission "Enable Futures"
5. Save

The screenshot displays the 'API Key' configuration page. It is divided into two main sections: 'API restrictions' and 'IP access restrictions'.

API restrictions:

- Enable Reading:** Checked (indicated by a grey checkmark).
- Enable Spot & Margin Trading:** Checked (indicated by an orange checkmark, highlighted with a red box and labeled '3').
- Enable Futures:** Checked (indicated by an orange checkmark, highlighted with a red box and labeled '4').
- Enable European Options:** Unchecked.
- Enable Margin Loan, Repay & Transfer:** Unchecked.
- Permits Universal Transfer:** Unchecked.
- Enable Symbol Whitelist:** Unchecked.
- Enable Withdrawals:** Unchecked.
- An **Edit** button is located next to the 'Enable Symbol Whitelist' option.

IP access restrictions:

- Unrestricted (Less Secure):** Unselected. A red warning message states: 'This API Key allows access from any IP address. This is not recommended. To protect the safety of your funds, if the IP is unrestricted and any permission other than Reading is enabled, this API key will be deleted.'
- Restrict access to trusted IPs only (Recommended):** Selected (indicated by an orange dot, highlighted with a red box and labeled '1').
- Trusted IP Address:** A text input field containing '140.123.106.143' with a red 'X' icon next to it, indicating it is invalid. This field is highlighted with a red box and labeled '2'.

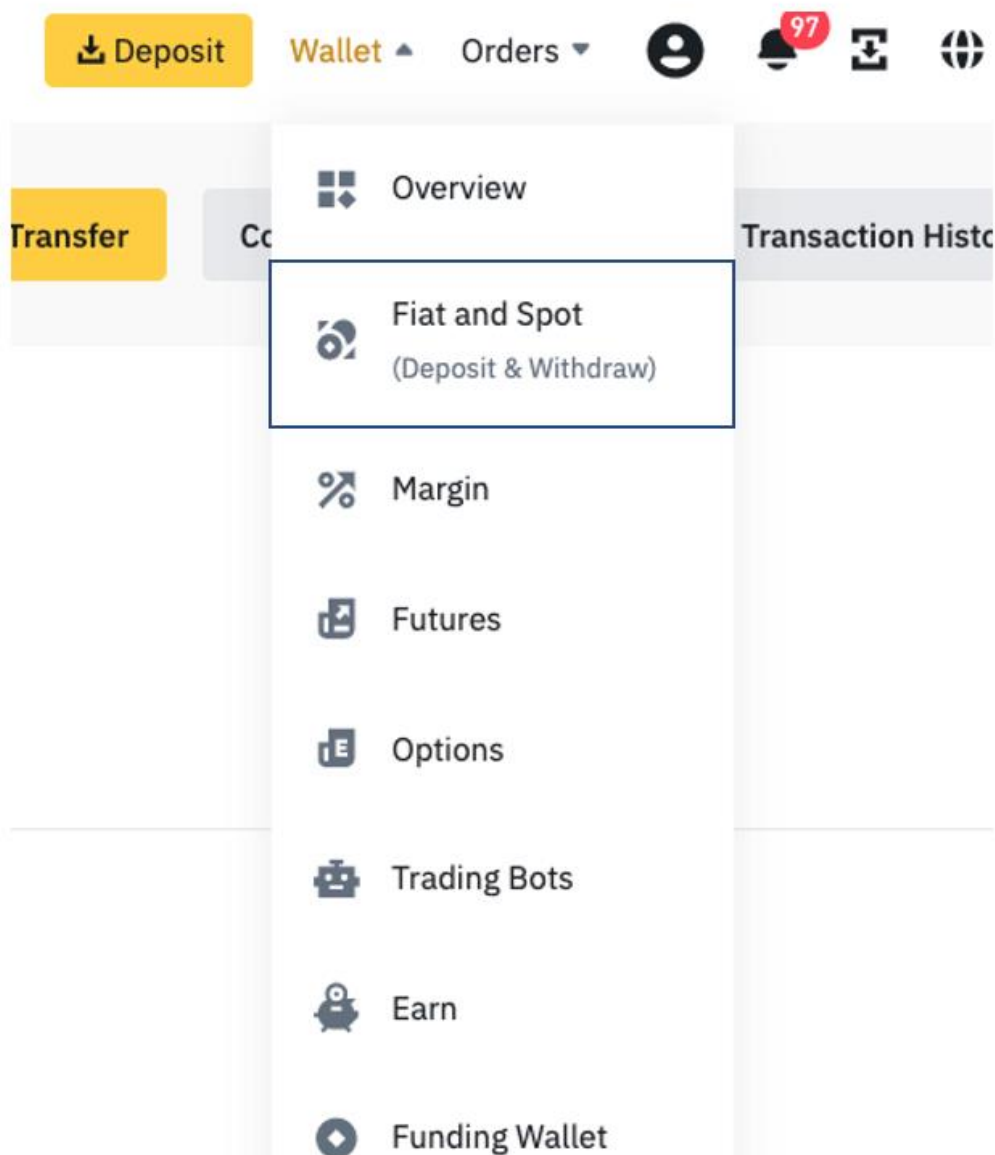

Deposit margin into the Binance Futures wallet

* Please ensure that the contract wallet has sufficient USDT as margin before executing the contract trade.

The following is a demonstration of transferring USDT from the spot wallet to the futures wallet

Step1.

Find the wallet and click on "Fiat and Spot".

Step2.

1. Search “USDT”
2. Confirm wallet balance
3. Click “transfer” bottom

3

Fiat and Spot Deposit Withdraw Send Transfer

Estimated Balance  0.03214565 BTC ≈ \$819.48

Spot balance 0.03214565 BTC ≈ \$819.48

Fiat balance 0.00000000 BTC ≈ \$0.00000000

1
